ME-B Series 65” and 75” Commercial LED HDTV/LCD

Slim, lightweight and narrow. And yet they make a huge impact.

Supreme Picture Quality and Content Versatility with Lower TCO

You wouldn’t think sleekness could stop people in their tracks. But that’s precisely what happens with the Samsung ME-B Series displays. Even with their stylishly thin profiles, the picture quality is outstanding. Thanks to Samsung’s LED BLU panel technology, you get deeper blacks, brighter colors and reduced blurring. This makes them ideal for a wide range of environments, from education and retail to finance, healthcare and government. Of course, being ultra-slim, they save space. Being ultra-light, they enable easier installation and maintenance. And they do it all with style. **Business. Innovated.**

Slim and Light LED Design

The slim and lightweight design of the ME-B Series provides increased energy savings of 35% or more over CCFL backlit displays. The stylishly thin chassis helps simplify installation, and narrow bezels help provide a more impactful message.

Edge-Lit LED Screen

5,000:1

The edge-lit 65"/75" displays of the ME-B Series feature 1920 x 1080 resolution with up to 550 nits brightness (ME75B model) and 5,000:1 contrast ratio for sharp, detail-rich images and crisp, easily legible type.

Embedded Media Player with MagicInfo Lite

USB

The ME-B Series offers an embedded media player (USB Plug and Play with MagicInfo Lite software). Users can play media without an additional player, and can easily display or schedule video clips, slide shows and image files.

RS232 Control and Smart Scheduling

Easily control such functions as power on/off, source, volume, channel, brightness and contrast. Smart scheduling enhances the user experience and displays specific content on a scheduled loop.

PIM Option

Samsung’s Plug In Module accessory provides a built-in PC solution while eliminating cables and external hardware for a clutter-free environment.

Optional Touch Overlay

Add an optional IR touch overlay accessory (ME65B model) to enable up to 6 simultaneous touch points.
